POSTING DETAILS:

Position Location:

City: Perrytown, Arkansas

Office: Sulphur River Wildlife Management Area

Division: Wildlife Management

Job Summary:

The Arkansas Game and Fish Commission (AGFC) Biological Technician I is responsible for forest and fish propagation, fire prevention, cultivation, and harvesting activities and/or maintaining a wildlife management area. This position is governed by state and federal laws and agency policy.

Typical Functions:

- Inspects forest lands for damage by insects or disease, assists in implementing plans or recommendations for control measures, and prepares plans for site preparation or improvement of planting, harvesting, marketing, or wildlife use
- Conducts or assists in conducting research on collected samples, such as fish, blood, water, soil, and plant species, and examines animals and specimens to detect diseases or other problems
- Conducts agricultural and forest management activities on wildlife management areas, including preparing seed beds and plant foods; selects and marks trees for thinning and/or logging utilizing soil erosion control measures and maintains waterways, dams, and ponds
- Monitors and inspects public and private wildlife to ensure compliance with state regulations and trains various personnel in activities, such as fire safety, accident prevention, and maintenance and calibration of scientific and technical equipment
- Gathers, provides, and presents general and forestry educational information and training to various federal, state, and local health officers, community organizations, and the general public
- Provides technical support and services for scientists and engineers working in fields, such as agriculture, environmental science, resource management, and biology
- Assists in conducting fish and game propagation and maintenance activities, including monitoring of spawning, hatching, incubation, sexing, and feeding
- Prepares reports pertaining to wildlife findings, conclusions, and recommendations
- Cleans, maintains, prepares, and supplies work areas
- Performs other duties as assigned

Specific Duties and Responsibilities:

Will work under the direct supervision of a Field Biologist. Will be responsible for planning, coordinating and/or directly overseeing/implementing the day to day work activities on Sulphur River Wildlife Management Area. Collect and submit scientific data and specimen samples for analysis, write reports, and maintain records, present oral and written information. Proficient in the use of a variety of computer software applications including MS Excel, MS PowerPoint, and MS Word. Will be required to operate water control structures. Operate and maintain tractors and farm implements. Utilize wildlife management equipment. Will be required to carry out specialized agricultural practices to improve habitats. Will provide oversight and intensive coordination and monitoring of various types of contract work. Must assume a proactive role in assisting in the development of area budgets, maintaining ledgers and records, managing budgets and submitting reports. Coordinates with Regional supervisory staff to develop and implement habitat management plans for open land, upland and bottomland hardwood forest, and moist soil habitats. Oversees and directs management and identifies repair and maintenance upkeep needs for commission equipment, machinery, properties and capital improvements. Prepares materials for public presentation and gives presentations to various organizations. Performs a variety of other tasks as needed within the region, other AGFC Divisions or other areas of the state. Will be required to receive various specialized training and certifications in, but not limited to prescribed fire, pesticide application, equipment safety and operation, and first aid. Requirements of occasional overnight travel to attend various training, seminars or assignments may be necessary. Perform strenuous and physically demanding tasks and work outdoors year round in inclement weather. May be required to work on certain holidays and weekends. Inspects forest lands for damage by insects or disease, assists in implementing plans or recommendations for control measures, and prepares plans for site preparation or improvement of planting, harvesting, marketing, or wildlife use. Conducts agricultural and forest management activities and operation of agriculture equipment on wildlife management areas, including preparing seedbeds, planting, disking and bush hogging. Gathers, provides, and presents general wildlife and forestry educational information to various federal, state, local health officers, community organizations, and the general public. Assists in conducting various research projects, CWD, heard health check, quail surveys, turkey surveys, wood duck/dove/goose banding. Prepares reports pertaining to wildlife findings, conclusions and recommendations. Cleans, maintains, prepares and supplies work areas. The individual selected for this position will also be responsible for assisting with capture and relocation of nuisance alligators/bears/hogs, and handle general nuisance animal calls as needed in the Region.

Certificates, Licenses, or Registrations:

Must possess a valid Arkansas driver's license.

Special Job Dimensions:

n/a

Other Specific Information:

This position is required, as per the Prescribed Fire Planning and Implementation Procedures and Policy, to obtain Prescribe Fire Certification and complete a two-mile walk carrying 25 pounds in 30 minutes. This position is required to obtain a Non-Commercial Pesticide Applicators license with 1 year of employment.

All applicants are subject to a criminal background check.

As an equal opportunity employer, the Commission will make any reasonable accommodations necessary to ensure equal employment opportunities.
