Ability to plan work independent of close supervision.

Prescribed burning experience is preferred.

POSTING DETAILS:

Position Location:

City: Jonesboro

Office: Jonesboro Regional Office

Division: Wildlife Management

Job Summary:

The Arkansas Game and Fish Commission (AGFC) Biologist II is responsible for supervising a wildlife management program. This position is governed by state and federal laws and agency policy.

Typical Functions:

Plans and conducts various biological surveys to investigate population, habitat, and ecology of game and fish species and conducts studies of game and fish propagation, cultivation, and harvest.

Analyzes and evaluates survey and sampling data and writes reports describing the results of the data and makes recommendations on game and fish populations.

Directs the development of various wildlife management areas or fish propagation and cultivation and treatment plans based on district management plans. Assists supervisor with districts' annual budgetary projections, prepares various reports and purchase orders, requisitions for equipment, supplies, and parts, and prepares monthly activity reports.

Makes presentations to civic groups, schools and clubs, and conducts public meetings to explain new and/or proposed rules and regulations and/or to hear complaints about wildlife management.

Writes articles for news releases on game and fish activities in district.

Assists supervisor in the development of game and fish management plans and proposals to expand or improve management areas.

Performs other duties as assigned.

Specific Duties and Responsibilities:

Develops, implements, directs, supervises and monitors forested habitat management plans and habitat-related activities on state-owned Wildlife Management Areas (WMA). Provides professional/technical advice and direction to field staff regarding manipulation and management of forested habitat types in the north east portion of Arkansas.

Directs and conducts WMA silvicultural activities, including timber harvest, comprehensive resource inventories, timber marking, chemical injection and other service contracts and implements contract auditing procedures for these projects. Serves as a member of the regional prescribed fire crew during planned burns on state-owned WMAs. Utilizes Global Positioning System equipment and forestry software to complete job duties. Develops GIS maps and land information databases for resource planning, management and agency databases.

Submits oral and written reports and maintains WMA management data files. Develops, directs, submits and monitors annual/project budgets. Carries out professional and technical duties as assigned. Conducts public relations work with various types of agencies, private industry, professional and civic organizations and outdoor recreational groups. Must understand and be willing to function in a multi-faceted, team-oriented work environment.

Must maintain close individual contact with and develop solid working relationships with all Wildlife Management Division personnel. Heavy physical demands in inclement weather may be frequently required. Required physical fitness test for control burning includes successful completion of pack test. Some overnight travel is required.

All applicants are subjected to a criminal background check.

Certificates, Licenses, or Registrations:

N/A

Special Job Dimensions:

Frequent in-state travel and field work with exposure to inclement weather is required.

Occasional exposure to hunters and dangerous animals may be required.

Other Specific Information:

.

As an equal opportunity employer, the Commission will make any reasonable accommodations necessary to ensure equal employment opportunities.
